

Judul :

Mengaktifkan Text Exemption Rules di IMSS

Fungsi :

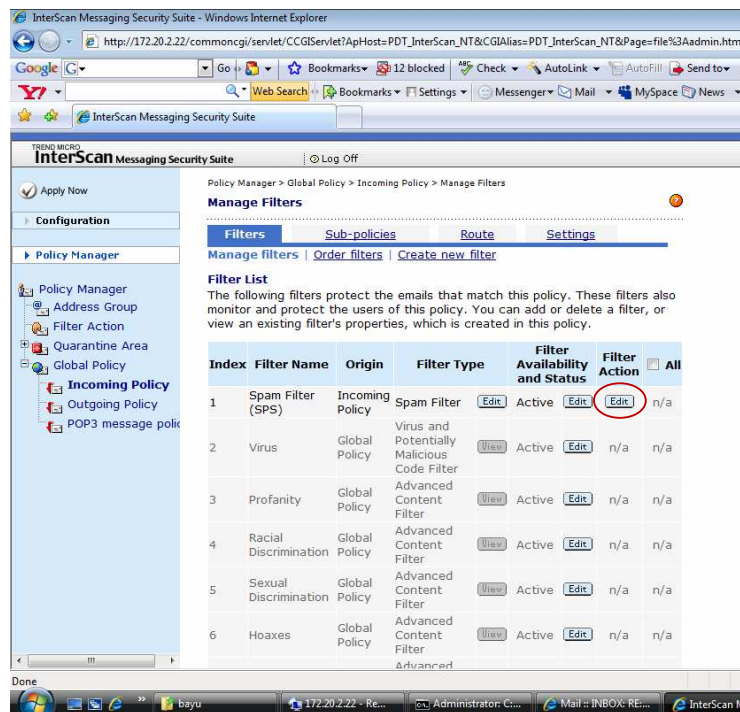

Untuk mendefinisikan suatu text yang ada di header email sehingga text yang ada di header email tersebut tidak akan di filter oleh anti spam dari IMSS.

Deskripsi :

Dengan mengaktifkan Text Exemption maka IMSS akan menghentikan **Anti Spam(SPS)** yang ada di dalam **IMSS** untuk me-scan email yang sudah di definisikan di **Text Exemption** tersebut. Tapi Anti Virus IMSS tetap me-scan email yang headernya telah di registrasi ke dalam **Text Exemption** tersebut.

Langkah-langkah

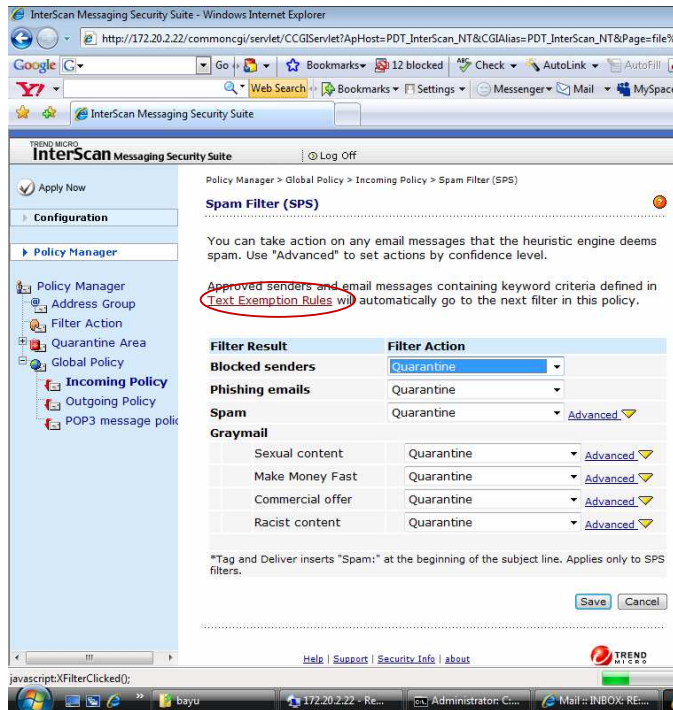

- Buka Menu Policy Manager-Global Policy-Incoming Policy-Manage Filter
- Edit Filter Action

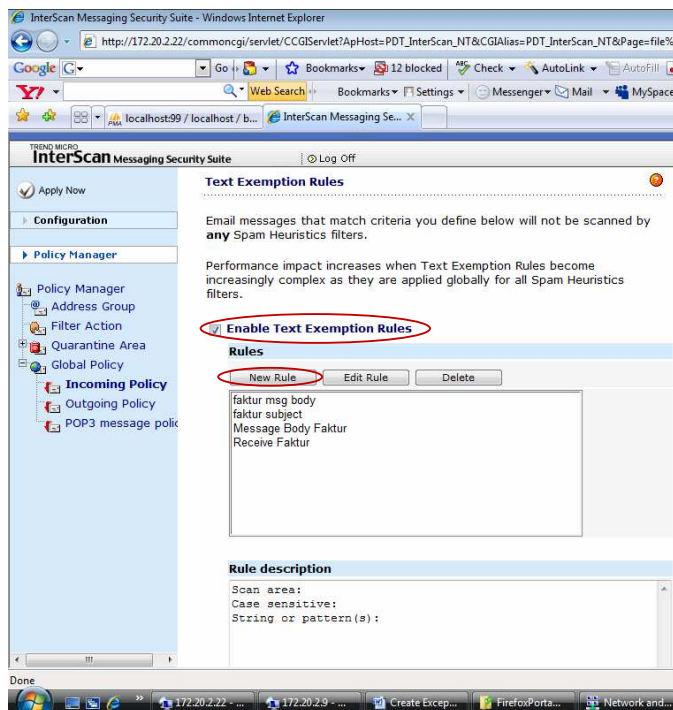

The screenshot shows the InterScan Messaging Security Suite web interface. The main content area is titled "Manage Filters" and contains a table of filters. The table has the following columns: Index, Filter Name, Origin, Filter Type, Filter Availability and Status, and Filter Action. The first row is for the "Spam Filter (SPS)" and its "Filter Action" is circled in red. The other rows are for "Virus", "Profanity", "Racial Discrimination", "Sexual Discrimination", and "Hoaxes".

Index	Filter Name	Origin	Filter Type	Filter Availability and Status	Filter Action	All
1	Spam Filter (SPS)	Incoming Policy	Spam Filter	Active	Edit	n/a
2	Virus	Global Policy	Virus and Potentially Malicious Code Filter	Active	View	n/a
3	Profanity	Global Policy	Advanced Content Filter	Active	View	n/a
4	Racial Discrimination	Global Policy	Advanced Content Filter	Active	View	n/a
5	Sexual Discrimination	Global Policy	Advanced Content Filter	Active	View	n/a
6	Hoaxes	Global Policy	Advanced Content Filter	Active	View	n/a

Klik Link Text Exemption Rules

- Centang **CheckBox Text Exemption Rules**
- **Klik Tombol New Rule** untuk membuat Rule Baru

- Pilih jenis **Scan Area**, Misal : Subject
- Isi kolom **Line Beginning**

Contoh :

.REG. Invoice

Keterangan

Dengan mengisi Line Beginning Seperti Contoh Diatas , maka email yang didalam subjectnya ada kata "Invoice" tidak akan di scan oleh anti Spam IMSS.

Kata ".REG." merupakan kata yang digunakan untuk regular expression.
